HUNTING AND HARVEST REPORT

MONTANA DEPARTMENT OF FISH, WILDLIFE & PARKS

1991 DEER HUNTING AND HARVEST REPORT

MAY 7, 1992

PREFACE

Survey Approach

Resident and nonresident deer license holder samples were randomly selected from a population of all resident and nonresident deer license holders in our license database. Deer hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

TOTAL HUNTERS	The number of hunters who hunted one or more days
TOTAL HUNTER DAYS	Sum of whole days or portions of days hunted
SUCCESSFUL HUNTERS	The number of hunters who killed one or more deer
PERCENT SUCCESS	The number of successful hunters divided by the total number of hunters and multiplied times 100
RSDNT	A symbol for resident
NRSDNT	A symbol for nonresident
ANTL-	A symbol for antlerless
ANTL+	A symbol for antlered
UNKWN	A symbol for unknown used to designate unknown sex
GEN A	An abbreviation for general deer "A" license, including those deer "A" licenses included with the resident Sportsman's license and nonresident Big Game Combination and Deer Combination licenses
GEN OC MD	An abbreviation for general, unlimited, multi-district, antlerless mule deer "B" license
GEN OC WT	An abbreviation for general, unlimited, multi-district, antlerless whitetail deer "B" license
SP	An abbreviation for special license or permit
UNKNOWN	A license category where the license used to take the deer was unknown
LOWER	Lower confidence limit at a level of confidence of 80 percent
POINT	The estimated value
UPPER	Upper confidence limit at a level of confidence of 80 percent

Explanations

The deer hunting and harvest statistics are estimates made from a sample of 49,996 questionnaires representing about 26 percent of all deer license holders. Confidence-interval estimates are given for resident and nonresident combined hunting statistics and for mule deer, whitetail, and combined deer harvest statistics. Confidence intervals are given at the 80 percent confidence level, meaning that the actual value will be between the lower and upper limit in four out of five cases. The relative precision of the estimate increases with the size of the estimate. Regional estimates have greater relative precision than district estimates and the statewide estimates have the greatest relative precision.

(CONTINUED)

PREFACE (CONTINUED)

All valid response data are used in the estimates even when some data fields are missing. This is the reason for the various unknown categories given in the report. The unknown license type given in the harvest sections is used to represent deer kills which could not be associated with a particular licnese/season type. Hunting or harvest activity in an unknown or invalid hunting district within a valid region is represented as "RXX" where R is the regional number 1 through 7. An unknown district in an unknown region is represented as "XXX". The unknown district or region activities are still incorporated into the regional or state totals respectively.

REGION 1 • DEER

TIME PERIOD OF KILL REPORT

MONTANA DEPARTMENT OF FISH, WILDLIFE & PARKS

1991 DEER TIME PERIOD OF KILL REPORT

MAY 8, 1992

PREFACE

Survey Approach

Resident and nonresident deer license holder samples were randomly selected from a population of all resident and nonresident deer license holders in our license database. Deer hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

UNKWN...............A symbol for unknown used to designate unknown time period of kill
GEN A...............An abbreviation for general deer "A" license, including those deer "A" licenses included with the resident Sportsman's license and nonresident Big Game Combination and Deer Combination licenses
GEN OC MD...........An abbreviation for general, unlimited, multi-district, antlerless mule deer "B" license
GEN OC WT...........An abbreviation for general, unlimited, multi-district, antlerless whitetail deer "B" license
SP..................An abbreviation for special license or permit
UNKNOWN.............A license category where the license used to take the deer was unknown

Explanations

The deer time period of kill statistics are from a sample of 49,996 questionnaires representing about 26 percent of all deer licnese holders. No expansions or estimates are given. The percentages are from the actual sample data collected. Sample number killed in each license category is given on the right side of each page. To obtain estimates of the actual number killed in a given time period, the percentages can be applied to the kill statistics in the hunting and harvest section of this report.

All valid response data are used in the analyses even when some data fields are missing. This is the reason for the various unknown categories given in the report. The unknown license type given in the harvest sections is used to represent deer kills which could not be associated with a particular licnese/season type. Hunting or harvest activity in an unknown or invalid hunting district within a valid region is represented as "RXX" where R is the regional number 1 through 7. An unknown district in an unknown region is represented as "XXX". The unknown district or region activities are still incorporated into the regional or state totals respectively.

ANTLER STATISTICS

PREFACE

Survey Approach

Resident and nonresident deer license holder samples were randomly selected from a population of all resident and nonresident deer license holders in our license database. Deer hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

ANTLER TYPE	The number of points on each side
FREQUENCY	The number of occurances of the given antler type in the given hunting unit within the sample data obtained
PERCENT	The percentage of the total represented by each frequency

Explanations

The deer antler point statistics are from a sample of 49,996 questionnaires representing about 26 percent of all deer licnese holders. No expansions or estimates are given. The frequencies and percentages are from the actual sample data collected. Total sample number killed in each hunting unit is given at the bottom of the frequency column. To obtain estimates of the actual number killed with a particular antler point count the percentages can be applied to the kill statistics for bucks in the hunting and harvest section of this report.

All valid response data are used in the analyses even when some data fields are missing. This is the reason for the unknown hunting unit categories given in the report. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 7. An unknown district in an unknown region is represented as "XXX". The unknown district or region activities are still incorporated into the regional or state totals respectively.
